PROFESSIONAL SUMMARY

Senior Flutter Engineer with 4+ years of experience building and scaling high-impact mobile products across the full SDLC in Agile/Scrum environments. Delivered 25+ Android and iOS applications with 450k+ downloads, driving performance improvements of up to 60%. Strong background in fintech and real-time platforms, specializing in clean architecture, modularization, and long-term product scalability.

SKILLS

- **Languages:** Dart (primary), Javascript, Python, PHP
- **Frameworks & Tools:** Flutter, Firebase, Node.js, DevTools, Git, CI/CD Pipelines (Github Actions, CircleCI).
- **State Management:** Riverpod (primary), GetX, Bloc, Cubit, Provider.
- **Database:** Firestore, Realtime Database, MySQL, MongoDB.
- **Integrations:** REST APIs, GraphQL APIs, Google Maps SDK, Agora (WebRTC), Push Notifications (Firebase, AWS SNS), Firebase Cloud Functions, Secure API communication, Data Encryption.
- **Quality Engineering:** Unit Testing, Widget Testing, Integration Testing, Test-driven development (TDD).
- **Performance & Observability:** Performance profiling, Memory optimization, Firebase Crashlytics, Sentry, Analytics integration (GA4, CleverTap), Production monitoring, Feature flagging.
- **Mobile Architecture & System Design**: Scalable feature-first architecture, Clean Architecture (layered & use-case driven), SOLID principles, Design patterns (Repository, Factory, Strategy), Dependency Injection, Modularization, Codebase governance, Architectural enforcement.

EXPERIENCE

Senior Flutter Engineer (Mobile Team Lead) - SoluLab ***Jan 2025 – Feb 2026***

- Led a mobile team of 8 engineers across Flutter, native Android/iOS, and React Native, owning delivery, technical direction, and release quality.
- Improved application stability by 45% by resolving 100+ production issues, significantly reducing crash rates and improving overall user experience.
- Owned end-to-end development of the PayX mobile application, a UPI-style payment platform similar to Google Pay/Paytm, handling architecture, core payment flows, integrations, and production releases.
- Refactored poorly structured legacy codebases into clean, modular Flutter architectures using proper state management and enforcing consistent coding standards.
- Defined and enforced modular client-side architecture across multiple apps, establishing clear feature boundaries and dependency rules to improve scalability and maintainability.

Flutter Developer - CodesLabz ***July 2024 – Dec 2024***

- Implemented real-time video and audio calling using Agora RTC, handling session lifecycle management, connection reliability, and real-time event synchronization.
- Improved app performance by 50% by resolving 75+ production issues and optimizing foreground and background notification handling.
- Integrated Razorpay payment gateway, implementing secure payment flows and API-driven transaction handling.

Flutter Developer – Allevents Informations Pvt. Ltd. ***July 2023 - July 2024***

- Led the development and deployment of a scalable event discovery and search feature, increased event discovery efficiency by 35%.
- Owned the release of the Event Manager app, implementing an offline ticket scanning system to ensure reliable operations during offline events.
- Improved application reliability by 25% by leveraging analytics tools (GA4, Redash, CleverTap) and optimizing notification delivery using AWS Simple Notification Service and CleverTap.

Wash in time Pvt. Ltd.

Flutter Developer ***Dec 2022 – June 2023***

- Promoted from Mobile Application Developer Intern to full-time Mobile Application Developer based on performance and ownership.
- Designed and implemented database architecture for multiple mobile applications, enabling scalable and real-time data access.
- Integrated multiple payment gateways (Stripe, Razorpay, Paytm, Cashfree), handling in-app payment flows and transaction lifecycle.
- Streamlined real-time user data systems to support internal sales operations and customer issue resolution.
- Migrated 5+ core functionalities and optimized performance across 4 applications, resulting in a 35% improvement in overall app performance.

Flutter Developer Intern ***Feb 2022 – Dec 2022***

- Built to core UI development and implemented Google Maps features for a production mobile application.
- Leveraged with Firebase services, including Firestore and push notifications, supporting real-time app functionality.

Flutter Developer Intern - Gymin ***Aug 2021 - Feb 2022***

- Implemented Firebase-backed features for state management, activity tracking, and QR code scanning.
- Integrated Stripe and Razorpay payment gateways and managed Play Store publishing for the application.

KEY ACHIEVEMENTS

- Owned end-to-end client-side architecture and delivery of a UPI-style payment application.
- Stabilized and refactored 5 production mobile applications, reducing crash rates by 45%.
- Led cross-platform mobile delivery across Flutter, Android, iOS, and React Native teams.
- Accelerated development and refactoring workflows by leveraging AI-assisted tooling for code analysis, debugging, and architectural validation.

EDUCATION

Teerthankar Mahaveer University, Moradabad

Master of Computer Applications ***Sep 2020 – Aug 2022***
